During your visit to the Mummies exhibition, you learned that the people of ancient Egypt and ancient Peru created mummies. Now you will write an essay in which you will describe two mummies that you observed in the exhibition.

First, write an introduction to your essay. Then, describe a mummy from ancient Peru. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Next, describe a mummy from ancient Egypt. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Lastly, write a concluding paragraph.

We went to the American Museum of Natural History and saw Peru mummies and Egypt mummies. We learned about the insides and outsides of both types of mummies.

One type of mummy was from Peru. The mummy on the outside had no color. The mummy on the outside also was tied in a sack with it inside. The scan showed that there was a mother inside. Also, the scan showed that there was a daughter inside too. There was corn inside the sack too.

Another type of mummy was from Egypt. The mummy on the outside had colors like red, blue, and yellow. Also, the mummy was in a special case called a tomb. The scan showed that the mummy on the inside was lying in posture. The scan even shows that the mummy had some skin on its
body. It also showed that there was blood on the mummy.

In conclusion, the mummies we saw were unique. We also saw how they mummified mummies in Peru, and how they mummified mummies in Egypt. We got to see what the scans showed about the mummies and what is inside with them or in them.
