

ALL WE ARE

NORRKÖPING
VISUALIZATION CENTER

We are all born here on the Earth, a planet that orbits the star we call the Sun in the Milky Way galaxy. But where do we really come from? And where is our place in the universe?

In *All We Are* the visitor is taken on a journey to the outermost limit of the universe and down to the very smallest component parts known to humanity - a journey in scale, but also in time and

space, investigating what is well-known but also showing scientific discoveries that are normally invisible to the human eye.

All We Are is the first film produced by Norrköping Visualization Center C for the dome theater and is directed by Carter Emmart from the Hayden Planetarium in New York.

Title: *All We Are*

Runtime: 20 minutes

Director: Carter Emmart

Executive producer: Anders Ynnerman

Producer: Anna Öst

Technical Director: Andreas Wetteborn

VISUALIZATION CENTER C

Exhibitions, research facilities, conference arena, restaurant and a spectacular dome theater. Visualization Center C is a meeting place about visualization - the result of a close collaboration between the Municipality of Norrköping, Linköping University, Norrköping Science Park and Interactive Institute.

Visualization Center C is located in Norrköping, Sweden.
