

**The Study of Spiders**

**Week 4**

**Introduction to Collecting**

**Vladimir:** To collect spiders, you don't need a large expedition: you can just go locally. In this case, we are using the south part of Van Cortlandt Park, in the Bronx, because it is 20 minutes by subway. It's a very nice spot because now it's springtime, there are a lot of flowers and grasses blooming and it's very easy to catch and collect spiders.
