During your visit to the Mummies exhibition, you learned that the people of ancient Egypt and ancient Peru created mummies. Now you will write an essay in which you will describe two mummies that you observed in the exhibition.

First, write an introduction to your essay. Then, describe a mummy from ancient Peru. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Next, describe a mummy from ancient Egypt. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Lastly, write a concluding paragraph.

We went to the Museum of Natural History in New York City. At the Mummy exhibit we saw mummies from Peru and Egypt. We will tell you about them and describe to you how the Mummies look like on the inside and on the outside by the CT scans.

One type of mummy we saw was from Peru. On the outside it looked like it was wrapped in some cloth and bobbins and rope to keep the cloth in place. In the inside it had a woman and her two children. The woman had her legs crunched up. One baby was laying straight. This is what the mummy looked like on the inside and on the outside.

Another type of mummy
We saw was from Egypt. On the outside it had a case with a bunch of hieroglyphics and the face of the case showed its gender. On the inside the body was laying straight inside the case. The scans showed it had no organs. Its nose and ears were gone too. This is how the mummy from Egypt looked like on the inside and on the outside.

In conclusion this is how the mummies from Peru and Egypt looked like on the inside and the outside. Looking at the mummies was very interesting. I am glad our class went on this trip.
Caption: The woman's legs are broken and there are offerings.
Caption: The skeleton of this mummy from Egypt is laid down straight.
