During your visit to the Mummies exhibition, you learned that the people of ancient Egypt and ancient Peru created mummies. Now you will write an essay in which you will describe two mummies that you observed in the exhibition.

First, write an introduction to your essay. Then, describe a mummy from ancient Peru. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Next, describe a mummy from ancient Egypt. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Lastly, write a concluding paragraph.

We went to the American Museum of Natural History and saw Peru and Egypt mummies and we had to tell about what it looked like and what the scan showed in the inside.

A Peru mummy on the outside had some of its parts sticking out of the bundle. The bundle also looked rusty. The shape of the bundle looked like a oval shape almost. And the scan showed that pieces of corn were also in the bundle. The bones were broken and were in many chunks. The scan also showed some items that belonged to them. They were also in a curled position.

A Egypt mummy on the
Inside, had a case with many patterns and symbols surrounding its body. On the top, there's a face on it. The case was also cracked. On the inside, the scan showed that the legs were stretched out. The scan also showed the organs and the lungs still inside. The teeth were worn down and the arms were in an X-shape position.

The only thing that is the same is that they are both mummies from the Ancient times. This shows what we saw and how we described them on the outside and what the scan showed.
