**Disciplinary Core Idea**

**4.PS4.B: Electromagnetic Radiation**

An object can be seen when light reflected from its surface enters the eyes. (4-PS4-2)

---

**Disciplinary Core Idea**

**4.LS1.A: Structure and Function**

Plants and animals have both internal and external structures that serve various functions in growth, survival, behavior, and reproduction. (4-LS1-1)

---

**Disciplinary Core Idea**

**4.LS1.D: Information Processing**

Different sense receptors are specialized for particular kinds of information, which may be then processed by the animal’s brain. Animals are able to use their perceptions and memories to guide their actions. (4-LS1-2)
**Performance Expectation**

**4-LS1-1:** Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.

*Clarification Statement:* Examples of structures could include thorns, stems, roots, colored petals, heart, stomach, lung, brain, and skin.

*Assessment Boundary:* Assessment is limited to macroscopic structures within plant and animal systems.

---

**Performance Expectation**

**4-LS1-2:** Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.

*Clarification Statement:* Emphasis is on systems of information transfer.

*Assessment Boundary:* Assessment does not include the mechanisms by which the brain stores and recalls information or the mechanisms of how sensory receptors function.

---

**Performance Expectation**

**4-PS4-2:** Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.

*Clarification Statement:* none

*Assessment Boundary:* Assessment does not include knowledge of specific colors reflected and seen, the cellular mechanisms of vision, or how the retina works.
### Science and Engineering Practice

#### Developing and Using Models

Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.

**Develop a model to describe phenomena. (4-PS4-2)**

---

#### Developing and Using Models

Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.

**Use a model to test interactions concerning the functioning of a natural system. (4-LS1-2)**

---

#### Engaging in Argument from Evidence

Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).

**Construct an argument with evidence, data, and/or a model. (4-LS1-1)**
Crosscutting Concept

Cause and Effect
Cause and effect relationships are routinely identified. (4-PS4-2)

Crosscutting Concept

Systems and System Models
A system can be described in terms of its components and their interactions. (4-LS1-1), (4-LS1-2)

Common Core State Standards for ELA/Literacy

Speaking & Listening
SL.4.5 - Presentation of Knowledge and Ideas
Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes. (4-LS1-2), (4-PS4-2)
### Common Core State Standards for ELA/Literacy

**Card Type name**

**W.4.1 - Text Types and Purposes**

Write opinion pieces on topics or texts, supporting a point of view with reasons and information. (4-LS1-1)

### Common Core State Standards for Mathematics

**Geometry**

**4.G.A.1 - Draw and identify lines and angles, and classify shapes by properties of their lines and angles.**

Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures. (4-PS4-2)

### Common Core State Standards for Mathematics

**Geometry**

**4.G.A.3 - Draw and identify lines and angles, and classify shapes by properties of their lines and angles.**

Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry. (4-LS1-1)
Common Core State Standards for Mathematics

Mathematical Practices
MP.4 - Model with mathematics

Model with mathematics. (4-PS4-2)
