During your visit to the *Mummies* exhibition, you learned that the people of ancient Egypt and ancient Peru created mummies. Now you will write an essay in which you will describe two mummies that you observed in the exhibition.

First, write an introduction to your essay. Then, describe a mummy from ancient Peru. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Next, describe a mummy from ancient Egypt. Your description should include both what it looks like on the outside and what its scan shows about the inside. Include a labeled drawing of the mummy with a caption. Lastly, write a concluding paragraph.

*In our School trip our class went to the Museum Of Natural History. We went to study Mummies. I think Mummies are fascinating because they have interesting facts like some Mummies were named after Kings. Do you know that there are not only Egyptian Mummies? There are also Peruvian Mummies from Peru. Their Mummies were in bundles. A bundle is what people call the cloth that they wrap the Mummies in. Do you know how people found out what was inside the bundles? They used CT scans. CT stands for Computed Tomography. One of the exhibits from Peru is Mother and Child. It was made in 1918. This bundle was found with a new born baby and his mom. It had a cup artifact but we don't know who put it there. The*
outside of the Mummies look like a big bag with one Mummy inside but when I looked inside I found out there where 2 people in the bundle. The inside of the Mummy has regular white bones and had some green parts. But most of the bones in the skeleton were cracked. The mother died in giving birth to the baby beside her. But do you know that the Mummies didn't have to be human? In Egypt they had animal Mummies like baby Crocodiles. The outside of this baby Crocodile looked like a really small crocodile raped in many colors and different shades of brown. The inside of the crocodile looks like a little cute animal and his bones is really white and thin. This baby crocodile Mummy was made in 390-370 BC. As we visited these exhibits we learned that Mummies don't have to be human to be Mummies and Egypt isn't the only place that has Mummies. A difference that I think about these Mummies is I think the Egyptians gave more gifts and they have more popular Mummies.
