

# **Polar Bears Need Ice to Survive**

This polar bear is trying to break into a den of seals hidden beneath the snow. Polar bears eat seals to survive. Because global warming is melting snow and ice in the Arctic, there is less of it for seals—and polar bears—to call home.

## WHAT TO DO:

1. Cut out each picture along the dotted line.
2. Arrange the pictures in the right order.
3. When you're happy with the order, tape them together on the backside.
4. Color the pictures!
