

North American Archaeology Internship

The North American Archaeology Department of the American Museum of Natural History offers Lab Researcher Internship positions in the North American Archaeology Lab (NAARCH Lab) for undergraduates, recent graduates, and graduate students. The interns will handle, store, and analyze a wide variety of artifacts from southeastern North America. Lab interns have the opportunity to work with faunal remains, lithics, Native American and European ceramics, Spanish colonial artifacts, and numerous other material types. Lab work typically consists of washing, cataloging, and organizing recent collections as well as data management. Additional projects have involved fine-grained sorting of excavated materials, non-destructive analysis using PXRF, and basic level artifact analysis and documentation. In addition to lab work, interns will also be considered for our ongoing fieldwork program in Georgia, USA (offered only for the fall and spring semester). Our fieldwork package offers room and board, transportation, and a monetary stipend for the duration of the trip, usually 2-3 weeks.

Individuals interested in joining the NAARCH Lab Internship should be highly motivated, patient, detail-oriented, and professional. Prior archaeological experience in either the field or in the lab is not necessary but will be a factor in our selection. The application form can be found at: <http://www.amnh.org/our-research/anthropology/policies-links/internship-program>, and is also attached at the bottom of the flyer. Remember to specify your interest in North American Archaeology on the application.

The internships are unpaid volunteer positions. A paid position is possible dependent on departmental funding. You may indicate your interest in a paid position on the application, but please be aware that checking only the paid position box may affect your chances. Course credit can be offered to those individuals currently enrolled in an accredited school of higher learning. The North American Archaeology Lab offers three internship sessions a year (summer, fall, and spring). The NAARCH department asks interns to commit three days a week, for a period of 10 weeks per semester. The number of interns accepted varies according to the research goals per semester.

Internship Application Deadlines 2020

- Summer Session (June to August), submit January 1 - March 1
- Fall Session (September to December), submit June 4 - August 4
- Spring Session 2021 (January to May), submit October 1 - December 1

Interested applicants must submit a resume or CV, contact information for three references, a one-page statement of purpose and the completed application form. The statement of purpose should briefly outline the applicant's prior experience in archaeology as well as their future plans within the discipline. Individuals with questions should feel free to email amusch@amnh.org

Applications may be sent to amusch@amnh.org or mailed to:
