Tissues Loan Policy Terms of Use Agreement

1. The American Museum of Natural History (hereafter “AMNH”) grants to the User as noted on the AMCC Loan Invoice form the non-exclusive license to use the tissues and data of specimens in accordance with the terms and conditions set out in this agreement.
2. Tissue loans are made to institutions, not to individuals, for scholarly research use by bona-fide investigators. When requested for use by students, the material is loaned to the advisor who accepts responsibility for the loan. Loaned material may not be removed to any other address without prior written permission from the AMNH. Commercial use is strictly prohibited.
3. Tissue loans may not be sent to, exchanged, loaned or re-gifted to any third party or cataloged into any collection without prior written consent from the AMCC.
4. Use of samples in any publication, website, repository, or any print or digital media must acknowledge AMNH as the holder/owner of the sample and must include appropriate attribution of AMNH, including object name and/or AMCC Barcode number, in each instance or appearance, except by prior agreement or where AMNH prohibits or disassociates its name from the use. User is asked to provide AMNH with copies of any publication resulting in whole or in part from the loan. Genbank numbers and identifiers related to published sequences generated from tissues and DNA extracts that are deposited in GenBank and other third -party repositories must be reported to the AMCC.
5. One copy of AMCC Loan Invoice form is to be signed, dated, and returned to the AMCC. By signing this agreement, the User acknowledges that it has read and agrees with the terms for AMNH loans as provided herein.
6. Unless expressly stated otherwise, AMNH makes no claims or warranties about the information content of the metadata associated with the samples, including the veracity of any taxonomic identifications, and disclaims any and all liability for uses of the work to the fullest extent permitted by applicable law. Efforts have been made to ensure the accuracy of information concerning identification, collecting locality, etc. but errors do exist. It is the borrower’s responsibility to verify sample identification.
