

Dr Norman I. Platnick (1951–2020)

It is with much sadness that we mourn the [passing](#) of [Dr Norman Ira Platnick](#), Curator Emeritus at the American Museum of Natural History (AMNH), New York, on April 8, 2020, in Philadelphia, PA, after a tragic accident. He married the late Nancy Stewart Price in 1970 and is survived by his son, William Durin Platnick, and daughter-in-law, Rebecca Ehrlich.

Norm was born on December 30, 1951, in Bluefield, WV, where he grew up. Getting what he called a ‘precocious start’, Norm became a college freshman at the tender age of 12, receiving a BS degree at 16, MS at 18, and PhD at 21. He has remarked that he lacked ‘a high school diploma, having made it only through grade 7’! The world authority on spiders, Norm’s lifelong interest began serendipitously while a teenager, majoring in Biology at [Concord College](#), Athens, WV, as a direct consequence of meeting his future wife, Nancy, ‘at Concord on October 12, 1967.’ Their son, Will, maintains that his father’s passion for spiders started because he ‘tried to impress a girl.’ Nancy, also pursuing a BS in Biology, had taken a course on arthropods and become fascinated with millipedes. According to Will, ‘my mom was an excellent collector and, when she went out, my dad would tag along to spend time with her.’ Norm was less successful at finding millipedes but collected spiders in abundance and tried to identify them back at college. The rest is history.

After graduating from Concord in 1968, Norm moved to Michigan State University, East Lansing, MI, where he was advised by Richard Sauer and graduated with a MS in Zoology in 1970, and finally to Harvard University, Cambridge, MA, where he was advised by Herbert Levi, and graduated with a PhD in Biology in 1973. He was appointed Assistant Curator in the AMNH Department of Entomology the same year, received tenure and promotion to Associate Curator in 1977, and promotion to Curator in 1982. He was awarded an endowed chair as Peter J. Solomon Family Curator of Spiders in 1998 and served in that capacity until retiring, whereupon he became Senior Scientist in Residence at the AMNH Division of Invertebrate Zoology (2010–2013).

As an [AMNH Curator](#), Norm took over stewardship of the Collections of Arachnida and Myriapoda from John Cooke, building on the legacy of Willis J. Gertsch to continue developing the spider collection into the world’s largest and most taxonomically comprehensive, a global resource with over a million specimens and 4,000 types. Norm’s arachnological expeditions to [Chile](#), as well as Argentina, Australia, Brazil, [Cuba](#), [Ecuador](#), New Caledonia, New Zealand, and Panama, were supported by \$4.3 million in research grants from the National Science Foundation (NSF), the National

Geographic Society, and other foundations. As Chairman of the Department of Entomology (1987–1994), Norm secured two NSF grants that enhanced ongoing curation of the terrestrial arthropod collections, partially supporting construction of the insect compactor, followed by an instrumentation grant to acquire a scanning electron microscope for the AMNH. He also served as Chair of the Scientific Senate (2006–2008). In addition to his position as Curator at the AMNH, Norm served as adjunct professor at City College, City University of New York (1978–2014), and Cornell University (1988–2014), and as adjunct senior research scientist for the Center of Environmental Research and Conservation at Columbia University (1999–2014).

Norm was a prolific [scientist](#), publishing almost 12,000 pages in 338 printed publications, including 42 monographs, five books and two edited volumes over the course of his four-decade career. This exceptional body of work fundamentally affected several fields. His early works, including the influential book 'Systematics and biogeography: Cladistics and vicariance,' coauthored with Gareth Nelson, and seminal papers on areas of endemism, species concepts, cladistic analysis of linguistic sequences, and the history and philosophy of systematics, among others, were instrumental in disseminating Hennigian tree-thinking and phylogenetic classification, profoundly influencing systematic biology, historical biogeography, and evolutionary biology more generally.

In arachnology, the study of spiders and their kin, Norm laid the framework of spider classification and the Tree of Life early on, along with introducing new techniques, such as scanning electron microscopy, and character systems, such as spinneret morphology, which forever changed the course of spider systematics. His prodigious monographic revisions and many smaller papers, on most of which he was sole or lead author, added 158 new genera and 2,023 new species of spiders (including many novelties such as *Neato*, *Oreo*, *Queenvic*, *Notnops*, *Nyetenops*, *Taintnops*, *Tisentnops*, *Paradysderina righty*, and *Paradysderina lefty*), vastly increasing knowledge of spider diversity on a global scale, and especially the poorly known fauna of the Southern Hemisphere, to currently more than 48,000 species. An authority on at least ten spider families, Norm described taxa in some 50 of the 120 families currently recognized, spanning all three suborders, as well as the arachnid order Ricinulei (hooded tick-spiders), in which he described a new genus and 12 new species. His contributions, together with the [World Spider Catalog](#), which he created as a unified nomenclatural and taxonomic resource, and updated biannually over the course of two decades, elevated spiders to a unique position. Unlike most other non-vertebrate taxa of comparable diversity, spiders now enjoy a completely up-to-date, online, species-level taxonomic database extending from Linnaeus to the present. In recognition of his contributions, Norm was made Fellow of the American Association for the Advancement of Science in 2003 and received the Pierre Bonnet Award for Devoted Service to the Advancement of Arachnology in 2007, among other honors. Four spider genera, *Normplatnicka*, *Platnickia*, *Platnickina* and *Platnicknia* (= *Modisimus*) and 48 species of spiders, other arachnids, and a millipede are named after him.

Keenly aware of the threats facing biodiversity, Norm was actively involved in initiatives to address the 'taxonomic impediment' by accelerating the pace of species discovery and description, including programs such as Systematics Agenda 2000: Charting the Biosphere, and received major grants implementing automated methods of species identification and description, and training the next generation of taxon specialists (e.g., the NSF Partnerships for Enhancing Expertise in Taxonomy). This vision culminated in the Planetary Biodiversity Inventories (PBI) and Revisionary Syntheses in Systematics programs which he co-developed during his tenure as Program Director for Biodiversity Surveys and Inventories in the NSF Division of Environmental Biology (2002–2003). In 2006, Norm put these approaches into practice on a global scale with his [PBI grant](#) on the megadiverse, microdistributed goblin spider family Oonopidae, involving more than 45 collaborating scientists in

12 countries worldwide. Over the course of eight years, using custom-built cyberinfrastructure, 1056 new spider species were described in 88 papers, increasing global spider diversity by 2.5% and moving Oonopidae from the 21st to the 8th most speciose family of spiders.

In addition to his role as fellow, president or councilor of numerous scientific societies, several of which he was instrumental in founding, and his service on copious editorial boards and scientific panels, Norm leaves a rich legacy in education. He advised or served on the committees of over 20 students and postdoctoral fellows, many of whom went on to illustrious careers in arachnology and systematics, around the world, and delivered about 100 scientific lectures in the US and abroad. The original [spider man](#), Norm promoted the old adage ‘if you wish to live and thrive, let a spider run alive’ via diverse [media](#), including the highly successful [Spiders Alive!](#) exhibition (2012–2013, and again in 2015), two children’s books on spiders, several popular magazine articles, and online videos, such as [‘Seeking Spiders – Biodiversity on a Different Scale’](#), where he notes: ‘if we wish to conserve as much biodiversity as possible, then we need to pay attention not just to the things that are easy to see, but also to the ones that are not so easy to see and tell us much more about the planet.’

In his spare time, Norm enjoyed ‘another life’ as an art aficionado, the origins of which, like his obsession with spiders, were ‘entirely Nancy’s fault!’ While frequenting antique shops with Nancy, who collected vintage eggbeaters, mixers and other mechanical kitchen [devices](#), Norm became interested in the art of magazine covers, advertisements, and articles from America’s ‘Golden Age of Illustration’ (1905–1920), ultimately amassing a collection of over 6,500 pieces. Between 1998 and 2020, Norm wrote 27 full-color books and three articles on the work of various artists from this period, a labor of love, demanding considerable time and energy to [self-publish](#), and was planning ‘at least as many more.’

Norm’s generous [personality](#), fierce intellect, and indomitable can-do approach won friends and admirers across the globe. His motto, ‘The best is none too good,’ long hanging on his office wall and still seen on his [Facebook page](#), speaks volumes about his attitude to his pursuits. When Norm first moved to New York, he and Nancy rented a ground floor apartment, on what was then a seedy West 80th Street, a block from his office at the AMNH. His friend and colleague, Toby Schuh, recalls ‘many a day when Norm would come to the AMNH at 2 or 3 am, do several hours work, and return home to have breakfast with his beloved wife before she left for work, returning to complete what for most would be a whole day’s effort.’

Prepared on April 8, 2020, by Lorenzo Prendini, Curator of Arachnida and Myriapoda, Division of Invertebrate Zoology, American Museum of Natural History, with contributions and assistance from Will Platnick, Toby Schuh, Gustavo Hormiga, Martín Ramírez, Ricardo Botero-Trujillo, Lou Sorkin, Dave Grimaldi, Tim Crowe, Theo Blick, Daniel Gloor and Peter Jäger. Updated on May 21, 2020.

Patronyms honoring Dr Norman I. Platnick

Genera of Araneae, with species assigned to them:

Anapidae:

- Normplatnicka* Rix & Harvey, 2010
- Normplatnicka barrettae* Rix & Harvey, 2010
- Normplatnicka chilensis* Rix & Harvey, 2010
- Normplatnicka lamingtonensis* (Forster, 1959)

Pholcidae:

- Platnickia* Özdikmen & Demir, 2009 [= *Modisimus* Simon, 1893]

Theridiidae:

Platnickina Koçak & Kemal, 2008

- Platnickina adamsoni* (Berland, 1934) [= *Platnickina mneon* (Bösenberg & Strand, 1906)]
- Platnickina alabamensis* (Gertsch & Archer, 1942)
- Platnickina antoni* (Keyserling, 1884)
- Platnickina blatchleyi* (Bryant, 1945) [= *Platnickina mneon* (Bösenberg & Strand, 1906)]
- Platnickina cinerascens* (Roewer, 1942) [= *Platnickina alabamensis* (Gertsch & Archer, 1942)]
- Platnickina fritilla* Gao & Li, 2014
- Platnickina hobbsi* (Gertsch & Archer, 1942) [= *Platnickina mneon* (Bösenberg & Strand, 1906)]
- Platnickina insulicola* (Bryant, 1947) [= *Platnickina mneon* (Bösenberg & Strand, 1906)]
- Platnickina kijabei* (Berland, 1920)
- Platnickina maculata* (Yoshida, 2001)
- Platnickina magnificum* (Archer, 1950) [= *Platnickina mneon* (Bösenberg & Strand, 1906)]
- Platnickina mneon* (Bösenberg & Strand, 1906)
- Platnickina nigropunctata* (Lucas, 1846)
- Platnickina punctosparsa* (Emerton, 1882)
- Platnickina qionghaiensis* (Zhu, 1998)
- Platnickina sterninotata* (Bösenberg & Strand, 1906)
- Platnickina talmo* (Chamberlin & Ivie, 1944) [= *Platnickina alabamensis* (Gertsch & Archer, 1942)]
- Platnickina tincta* (Walckenaer, 1802)

Zodariidae:

- Platnickia* Jocqué, 1991
- Platnickia bergi* (Simon, 1895)
- Platnickia bolson* Grismado & Platnick, 2008
- Platnickia elegans* (Nicolet, 1849)
- Platnickia roble* Grismado & Platnick, 2008
- Platnickia wedalen* Grismado & Platnick, 2008

Species of Arachnida and Myriapoda:

Amblypygi:

Charinidae:

- Charinus platnicki* (Quintero, 1986)

Araneae:

Agelenidae:

- Femoracoelotes platnicki* (Wang & Ono, 1998)

Amaurobiidae:

Teeatta platnicki Davies, 2005

Anapidae:

Anapisona platnicki Brignoli, 1981

Gigiella platnicki Rix & Harvey, 2010

Araneidae:

Neoscona platnicki Gajbe & Gajbe, 2001

Archaeidae:

Austrarchaea platnickorum Rix & Harvey, 2011

Barychelidae

Mandjelia platnicki Raven, 1994

Corinnidae:

Hortipes platnicki Bosselaers & Jocqué, 2000

Dipluridae:

Chilehexops platnicki Coyle, 1986

Gnaphosidae:

Drassodes platnicki Song, Zhu & Zhang, 2004 [= *Drassodes natali* Esyunin & Tuneva, 2002] |

Drassyllus platnicki Gajbe, 1987

Eilica platnicki Tikader & Gajbe, 1977

Marjanus platnicki (Zhang, Song & Zhu, 2001)

Parasyrisca platnicki Marusik, Fomichev & Omelko, 2019

Zimiris platnicki (Alayón, 1992) [= *Zimiris doriae* Simon, 1882]

Zimiromus platnicki Brescovit & Höfer, 1994

Idiopidae:

Neocteniza platnicki Goloboff, 1987

Linyphiidae:

Agyneta platnicki Dupérré, 2013

Liocranidae:

Oedignatha platnicki Song & Zhu, 1998

Malkaridae:

Ozarchaea platnicki Rix, 2006

Mecysmaucheniidae:

Mecysmauchenius platnicki Grismado & Ramírez, 2005

Oonopidae:

Neotrops platnicki Grismado & Ramírez, 2013

Niarchos normani Dupérré & Tapia, 2017

Opopaea platnicki Baehr, 2013

Orchestina platnicki Izquierdo, 2017

Prethopalpus platnicki Baehr & Harvey, 2012

Simlops platnicki Bonaldo, 2014

Palpimanidae:

Otiothops platnicki Wunderlich, 1999

Pholcidae:

Aucana platnicki Huber, 2000

Physocyclus platnicki Valdez-Mondragón, 2010

Salticidae:

Chalcoscirtus platnicki Marusik, 1995

Cocalodes platnicki Wanless, 1982

Philates platnicki (Zabka, 1999)

Sobasina platnicki Prószyński & Deeleman-Reinhold, 2013

Spartaeus platnicki Song, Chen & Gong, 1991

Sparassidae:

May norm Jäger & Krehenwinkel, 2015

Theraphosidae:

Aphonopelma platnicki Smith, 1995

Trochanteriidae:

Olin platnicki Deeleman-Reinhold, 2001

Opiliones:

Icalaptidae:

Zalmopsylla platnicki Kury & Pérez-González, 2002

Triaenonychidae:

Diasia platnicki Maury, 1987

Troglosironidae:

Troglosiro platnicki Shear, 1993

Ricinulei:

Ricinoididae:

Cryptocellus platnicki Botero-Trujillo & Pérez, 2008

Pseudocellus platnicki Valdez-Mondragón & Francke, 2011

Scorpiones:

Buthidae:

Ananteris platnicki Lourenço, 1993

Centruroides platnicki Armas, 1981

Vaejovidae:

Franckeus platnicki (Sissom, 1991)

Chordeumatida:

Chordeumatoidea:

Apodigona platnicki Shear, 1988

Arachnid taxa named by Dr Norman I. Platnick

Araneae: 158 genera (2 homonyms, 1 synonym); 2023 species (6 synonyms)

Actinopodidae: 1 genus

Plesiolenia Goloboff & Platnick, 1987

Agelenidae: 1 species

Draconarius cheni (Platnick, 1989)

Ammoxenidae: 3 genera; 11 species

Austrammo Platnick, 2002

Austrammo harveyi Platnick & Griffin, 1990

Austrammo hirsti Platnick, 2002

Austrammo monteithi Platnick, 2002

Austrammo rossi Platnick, 2002

Barrowammo Platnick, 2002

Barrowammo waldockae Platnick, 2002

Otiotrops pilleus Platnick, 1975
Otiotrops recurvus Platnick, 1976

Philodromidae: 6 species

Ebo bucklei Platnick, 1972
Ebo contrastus Sauer & Platnick, 1972
Ebo evansae Sauer & Platnick, 1972
Ebo iviei Sauer & Platnick, 1972
Ebo punctatus Sauer & Platnick, 1972
Titanebo cantralli (Sauer & Platnick, 1972)

Pholcidae: 1 species

Apokayana sedgwicki (Deeleman-Reinhold & Platnick, 1986)

Phrurolithidae: 5 species

Drassinella gertschi Platnick & Ubick, 1989
Drassinella siskiyou Platnick & Ubick, 1989
Drassinella sonoma Platnick & Ubick, 1989
Phrurotimpus bernikeræ Platnick, 2019
Phrurotimpus sorkini Platnick, 2019

Physoglenidae: 3 genera; 9 species

Chileotaxus Platnick, 1990
Chileotaxus sans Platnick, 1990
Paratupua Platnick, 1990
Paratupua grayi Platnick, 1990
Physoglenes chepu Platnick, 1990
Physoglenes lagos Platnick, 1990
Physoglenes puyehue Platnick, 1990
Tupua Platnick, 1990
Tupua bisetosa Platnick, 1990
Tupua cavemicola Platnick, 1990
Tupua raveni Platnick, 1990
Tupua troglodytes Platnick, 1990

Pisauridae: 3 species

Bradystichus aoupinie Platnick & Forster, 1993
Bradystichus panie Platnick & Forster, 1993
Bradystichus tandji Platnick & Forster, 1993

Stenochilidae: 2 species

Colopea tuberculata Platnick & Shadab, 1974
Stenochilus scutulatus Platnick & Shadab, 1974

Symphytognathidae: 1 genus; 12 species

Anapistula benoitii Forster & Platnick, 1977
Curimagua Forster & Platnick, 1977
Curimagua bayano Forster & Platnick, 1977
Curimagua chapmani Forster & Platnick, 1977
Globignatha sedgwicki Forster & Platnick, 1977
Patu digua Forster & Platnick, 1977
Patu eberhardi Forster & Platnick, 1977
Patu saladito Forster & Platnick, 1977
Symphytognatha blesti Forster & Platnick, 1977
Symphytognatha chickeringi Forster & Platnick, 1977
Symphytognatha gertschi Forster & Platnick, 1977
Symphytognatha goodnightorum Forster & Platnick, 1977
Symphytognatha ulur Platnick, 1979

Tetragnathidae: 2 species (1 synonym)

Glenognatha caporiaccoci Platnick, 1993
Tetragnatha caporiaccoci Platnick, 1993 = *Tetragnatha nitens*

Thomisidae: 1 genus; 1 species

Heterogriffus Platnick, 1976
Xysticus hui Platnick, 1993

Trachelidae: 45 species
