Student Worksheets

Welcome to the American Museum of Natural History!

You will visit three life-size models in the exhibition to observe what elephants and their relatives look like. Using your observations and the supporting text, describe how their body parts help these animals adapt to their habitats.

STOP 1 African Savanna Elephant

Look at the model. Use it to help you draw the missing parts in the picture below. Draw: □ trunk tusks ears □ hair □ how big you are next to the model Draw the elephant's habitat. (Hint: See the big banner on the wall above the food-and-water display.) **Circle** the words that describe the elephant's habitat: hills mountains flat plains rocky forests cold grassy hot warm **Describe** how these body parts help the elephant survive in its habitat: trunk tusks ears

hair

Draw:

□ how big you are next to the model

STOP 2 Woolly Mammoth

tusks

 \bigcirc **Look** at the model. Use it to help you draw the missing parts in the picture below.

ears

□ fur

Draw the mammoth's habitat. (Hint: See the painting behind the model.) Circle the words that describe the mammoth's habitat:	

Imagine how these body parts might have helped the mammoth survive in its habitat:

rocky

trunk
tusks
ears
fur

forests

hot

warm

grassy

cold

mountains

hills

flat plains

Dwarf Elephants

Look at the models. Use it to help you draw the missing parts in the picture below.
