

Discover the Living World Around Me

Weather: _____

What kind of place is this?

- ## What lives here?

Find a living thing to focus on.

Sketch and label it and its habitat:

- name (if known)
- what it looks like
- how it moves or grows
- other living things it interacts with
- clues that this habitat is a good home
(food, water, sunlight, shelter, space to grow)

- What might happen if one of these things disappeared?
- What am I curious to learn more about?
- What is one way I can help protect it and its habitat?
- Who do I want to tell about my discoveries today?
