

Discover Nature Through the Seasons

Choose a special place to visit three times
as the seasons change

Season: _____

What's around me?

- What signs of this season can I see, hear, or feel?
- Do I notice buds forming, flowers blooming, fruit ripening, or leaves growing, changing, or falling?

Pick a Plant to Track

Sketch a plant that you want to watch as the seasons change. Label:

- what kind of plant it is
- its parts (leaves, flowers, stems, trunk)
- a name I'm giving my plant

- What might happen to this place and to this plant when the season changes?
- What questions do I have about what I noticed?
- Who do I want to share my experience with?

Signs of the Seasons Journal

② My Second Visit

Go back to the same place.

Date: _____ Time: _____

Weather: _____

Season: _____

I notice...

What's around me?

- What signs of this season can I see, hear, or feel?
- Do I notice buds forming, flowers blooming, fruit ripening, or leaves growing, changing, or falling?

Find Your Plant

Sketch the same plant. Note:

- what stayed the same
- what changed
- what new details I notice

I wonder...

- What might happen to this place and to this plant when the season changes again?
- What new questions do I have about what I noticed?
- Who do I want to share my experience with?

③ My Third Visit

Go back to the same place.

Date: _____ Time: _____

Weather: _____

Season: _____

I notice...

What's around me?

- What signs of this season can I see, hear, or feel?
- Do I notice buds forming, flowers blooming, fruit ripening, or leaves growing, changing, or falling?

Find Your Plant

Sketch the same plant. Note:

- what stayed the same
- what changed
- what new details I notice

I wonder...

- What was the most surprising thing I discovered through the seasons?
- What do I want to keep watching?
- What is one way I can help care for this place?
- Who do I want to share my discoveries and experience with?
