

# Wetlands

## A Wading Bird Rookery

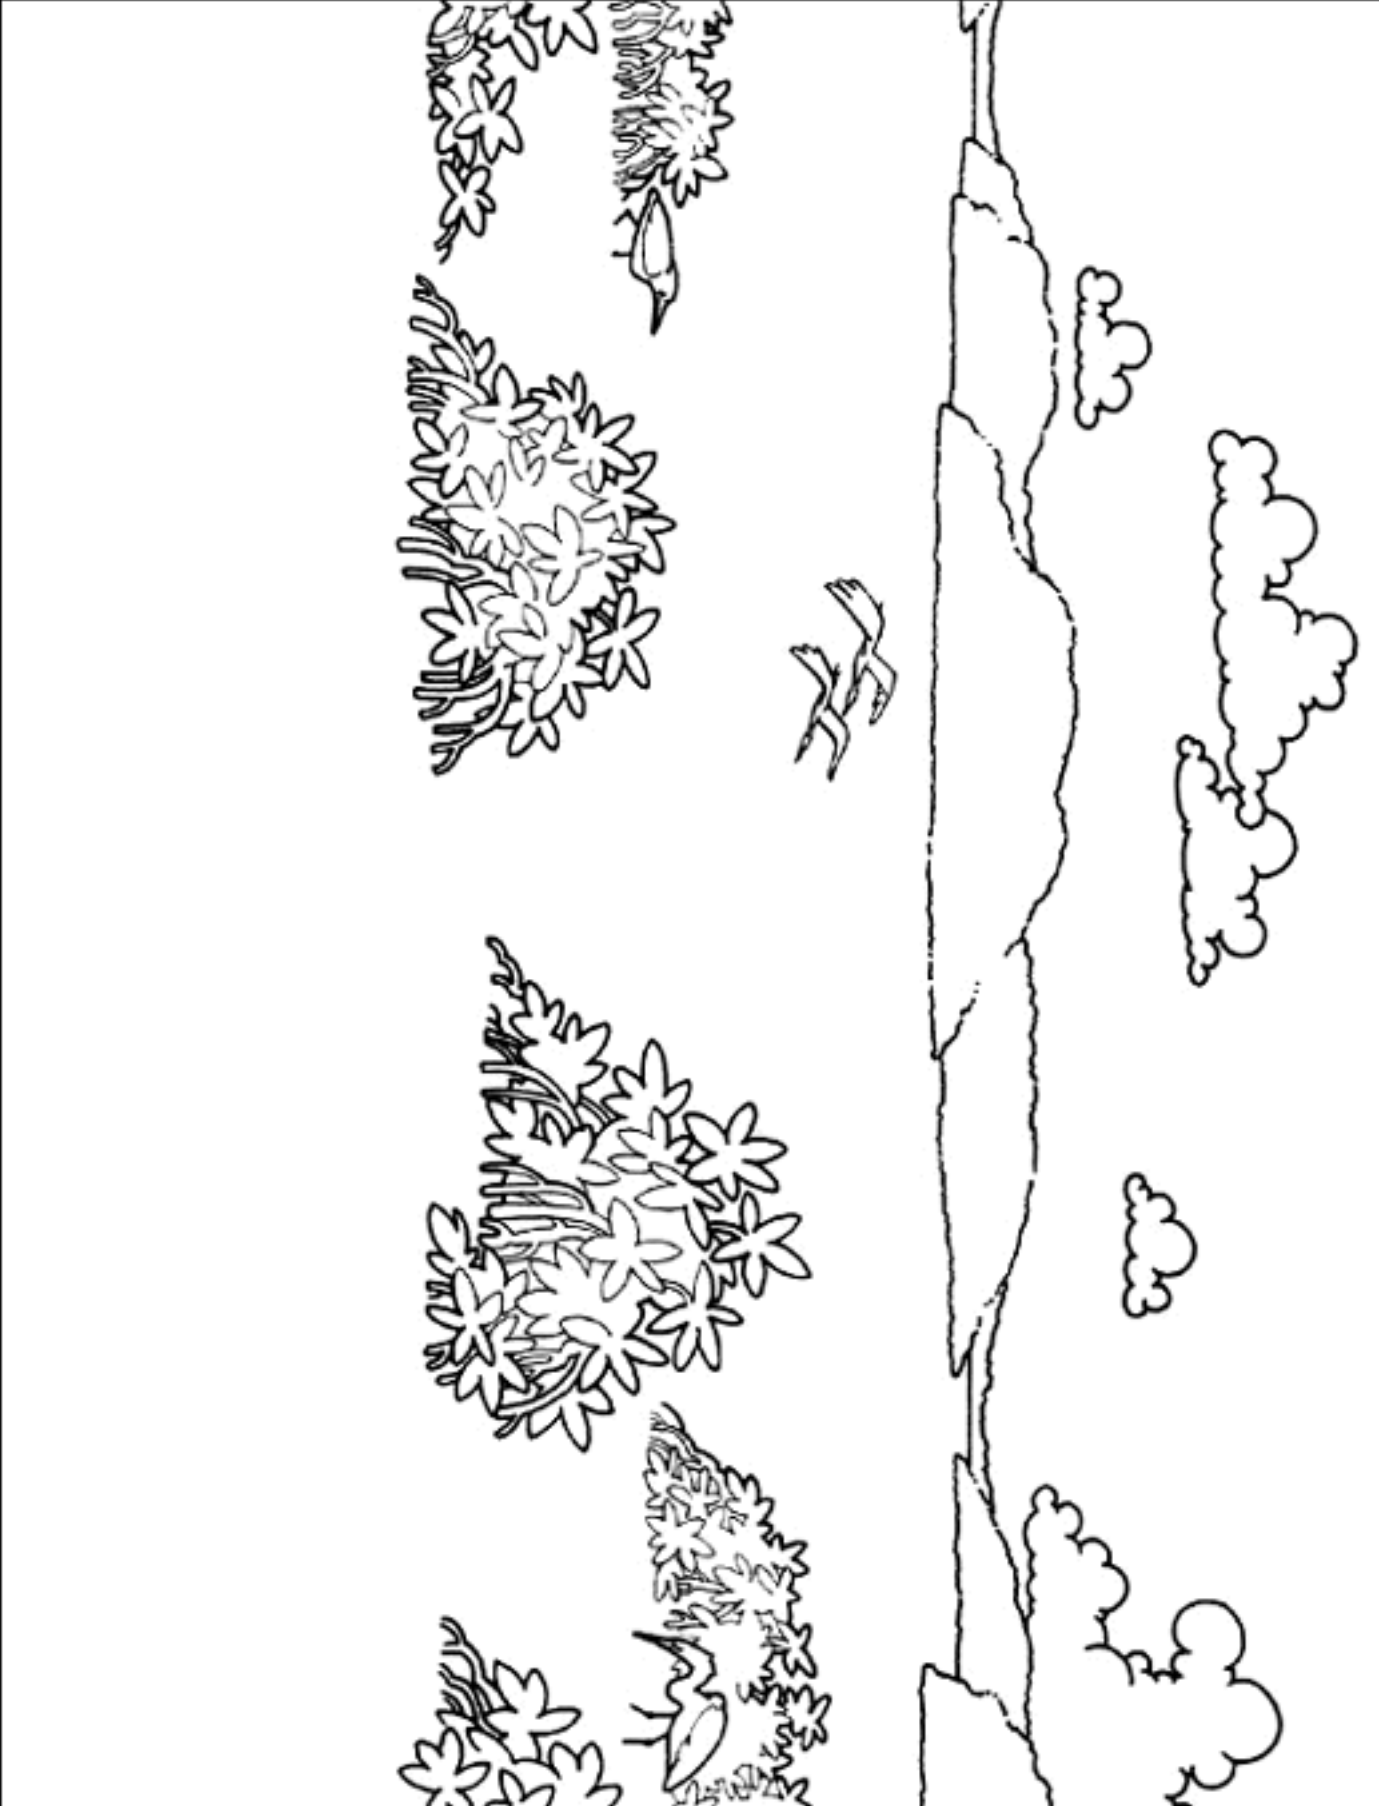

### Things you'll need:

Paper to print on, cardboard for backing, glue, scissors, and a box (like a shoe box).

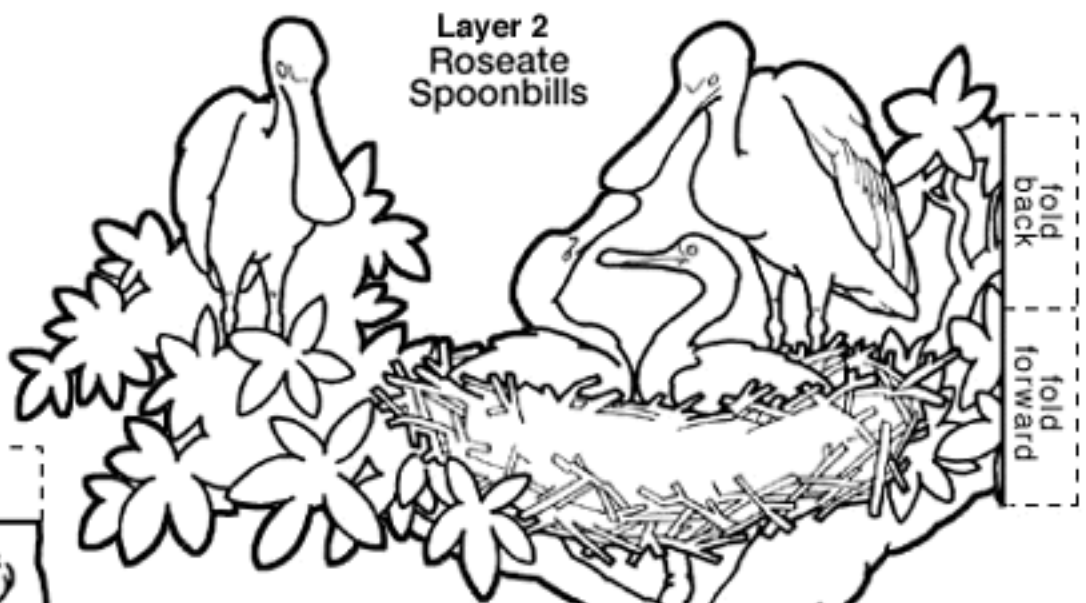

### Instructions:

1. Print out all three pages of the Wetlands diorama.
2. Color in the background, birds and trees. If you like, use the picture on the Wetlands diorama main page as a guide.
3. Glue or paste the birds and trees on pages 1 and 2 onto poster board, stiff paper or just another sheet of paper to make them stronger.
4. Cut your pictures out.
5. Using the picture on the Wetlands diorama main page as a guide, glue the background onto the back of the box. Then glue the cutout pictures of birds and trees to the bottom and sides of the box using the tabs attached to the pictures. The layers are numbered from front to back — Layer 1 is closest to the background.

(Note: As an option, you can use the stands provided to prop up your pictures instead of glueing them permanently into the box)

Layer 2  
Roseate  
Spoonbills
