Still there? Just choose what you want to do with the left control, then press the green button to begin.

**menu_narration**
When you were born you could have learned to speak any of these languages. But your brain changes as you grow and if you don't hear a sound while you're growing up it becomes much harder to say. Come and try out some different languages. First, choose one from the menu. You'll hear a phrase, and then repeat it. You can hear a recording of your voice; try the same phrase again; or move on to something a littler harder. Ready? Use the control on the left to make your choice, and press the green button to begin.
